*The intent of this yearly program is to provide a fire and flood safe environment in our canyon communities. This is accomplished through the collection of excess vegetation around your home. By eliminating these materials from the properties, you are protecting yourself in two ways. First, materials that are removed from your property can't be washed into creeks by heavy rain, creating a flood problem. Second, you are creating a "defensible space" around your property, assisting fire authority personnel in protecting you home during a wildfire*
